## CAREER OBJECTIVE

MCA candidate with a strong foundation in software development, object-oriented programming, web technologies, and database management. Hands-on experience developing full-stack applications using Python, Django, React.js, Node.js, Express.js, and SQL/NoSQL databases. Experienced in implementing application modules, designing database-driven features, integrating APIs, and developing user-focused solutions. Eager to leverage technical expertise and academic foundation to contribute to innovative, quality-focused technology teams.

## TECHNICAL SKILLS

**Programming Languages** — Python, Java, SQL, C

**Frontend** — HTML, CSS, Bootstrap5, React.js, Javascript, Flutter

**Backend** — Python, Django, Node.js, Express.js, REST API development

**Database** — MySQL, MongoDB

**Tools & Platforms** — Git, GitHub, VS Code, Android Studio, Postman

**Technical Concepts** — **Technical Concepts:** Object-Oriented Programming, DBMS, API Integration, Authentication and Authorization

## SOFT SKILLS

- Communication Skills
- Adaptability
- Teamwork & Collaboration
- Time Management
- Problem-Solving
- Leadership Skills

## PROJECTS

**VeAssist – Welfare Assistance Management System**
*Full-Stack Web Application | Ongoing Project*
- Developing a full-stack welfare assistance platform for naval ex-servicemen and their families, coordinating modules for scholarship assistance, vocational training, death assistance, case management, and document management.
- Implementing backend APIs and database-driven workflows, integrating authentication, application validation, deadline tracking, automated reminders, and map-based service discovery to streamline welfare service delivery using React.js, Node.js, Express.js, MongoDB, REST APIs, Git, Leaflet.

**Secure Volt Hub – EV Charging & Parking Management System**
*Academic Major Project*
- Developed an integrated mobile and web-based EV management system, implementing GPS-based navigation, charging station discovery, parking reservations, real-time slot availability, and vehicle maintenance features.
- Integrated blockchain-based verification to strengthen record integrity and coordinated mobile and web application components using Flutter, Python, MySQL, HTML, CSS, JavaScript, and Bootstrap.

**RentOut – Online Rental Management Platform**
*Academic Mini Project*
- Developed a web-based Online Rental Management Platform using Django and MySQL, supporting administrators and users with rental product listings, search and filtering, booking management, and transaction handling.
- Implemented features for rental workflows, payment-related processes, reviews, and ratings, using Python, Django, MySQL, HTML, and CSS.

## EDUCATION

**Master of Computer Applications (MCA)** 2025 – 2027 | Ernakulam, India
*Federal Institute of Science and Technology, Angamaly*

**Bachelor of Computer Applications (BCA)** 2022 – 2025 | Alappuzha, India
*College of Applied Science, Mavelikara*
- CGPA: 8.288

**Higher Secondary Education** 2021 – 2022 | Alappuzha, India
*Govt. Boys Higher Secondary School, Mavelikara*
- Percentage: 87.9

## CERTIFICATES

- Certiport IT Specialist - Java
- Certiport IT Specialist - HTML5 Application Development
- Prompt Engineering Certification - Dubai Future Foundation & DCAI

## ACHIEVEMENTS, LEADERSHIP & ACTIVITIES

- 1st Position in Website Cloning – Algorhythm 2026, FISAT
- Membership Chair – ACM-W Student Chapter, FISAT
- Research Paper Presenter – NCCMEA 2024 National Conference
- NSS Volunteer – College of Applied Science, Mavelikara

## INTERESTS

- Artificial Intelligence and Emerging Technologies
- Problem-Solving and Data Structures & Algorithms
- Database Management and API Development

## Declaration

I hereby declare that the information provided above is true and accurate to the best of my knowledge and belief.
